

June 15, 2010 – PRESS RELEASE

Delkor Introduces New Cartoning Technology

MINNEAPOLIS, MN – Delkor Systems, a leading manufacturer of Cartoning machinery, will be introducing its new Intelligent Positioning™ Carton Closing Technology at three major trade shows this fall.

These are:

- International Dairy Foods Expo in Dallas, TX, Sept. 13 – 15 at the Dallas Convention Center (Booth # 907)
- International Bakery Industry Exposition in Las Vegas, NV, Sept. 26 -29 at the Las Vegas Convention Center (Booth # 10246)
- Pack Expo International 2010 in Chicago, IL, Oct. 31 – Nov. 3 at McCormick Place (Booth # S-2517)

For all three shows, Delkor will be operating a complete top load cartoning line which includes Delkor's Trayfecta® Carton Former, Delkor's New Carton Loading System, and the Delkor Capstone Carton Closer with its advanced Intelligent Positioning™ technology.

According to Dale Andersen, President & CEO of Delkor Systems, Inc.: "We are very excited to demonstrate this new cartoning technology at these three trade shows this fall. Our engineering team at Delkor was the first to figure out how to electronically analyze the position and make precise corrections on each and every carton that enters the Delkor Capstone Carton Closer. Not only does this important new technology ensure that our customers will be able to close nearly-perfect cartons each and every time at speeds up to 150 cartons per minute, but it also reduces the number of parts and the machinery footprint by 35% over traditional carton closers. Delkor Systems is the first and only machinery builder to offer this new and important cartoning technology, making our exhibits must-see destinations if you are planning to attend one of these trade shows this Fall."

For more than 30 years, Delkor Systems, Inc. has manufactured innovative packaging systems that automatically form, load, inspect, wrap and seal end-of-line trays, cartons and cases. The company's practical solutions enable customers to become lower-cost producers through the use of automation, robotics and other
