

September 6, 2011 – **PRESS RELEASE**

New Delkor Capstone TriSeal Carton Closer puts Best Footprint Forward at International Dairy Show 2011 and Pack Expo Las Vegas 2011 Trade Shows.

MINNEAPOLIS, MN- The new TriSeal Carton Closer TSC-300z, the latest addition to Delkor's Capstone Closer product line, requires less than 25 square feet of plant floor space, which is significantly less than most other three-flap carton closers available today. Designed for low-/mid-range throughput, even hand-pack operations, at up to 60 cartons per minute, the Model TSC-300z provides precision closing for a variety of preformed carton styles: TriSeal Flap, Single- or Side-Flap.

The Closer is designed to match the pace of a Delkor Trayfecta Carton Former when operating a single forming head. Both Delkor machines – Former and Closer – share a common controls architecture which supports system integration and operator training while minimizing the on-site inventory of spare parts. The Trayfecta Carton Former and the Delkor Capstone TriSeal Carton Closer TSC-300z will be demonstrated in the company's booth 1123 during the International Dairy Show 2011 (Sept. 19-21, Atlanta, GA) and booth C-4045 during Pack Expo International Las Vegas 2011 (Sept. 26-29), respectively.

Delkor Systems, Inc. is a leading North American manufacturer of innovative packaging solutions for Cartoning, Case and Tray Packing, Retail Ready/Shelf Ready Packaging, and the proprietary Spot-Pak® System. This PMMI-member company, based in Minneapolis, MN, has an international focus that encompasses packaged goods manufacturers in the United States, Canada, Mexico, Central and South America, Australia and New Zealand.
