

June 23, 2009 – PRESS RELEASE

Glen Long Joins Delkor Systems as Vice President

Circle Pines, MN, June 2009 . . . Glen A. Long has joined the management team of Delkor Systems Inc. as Vice President. He will manage key functional areas of the company, including Sales and Service, Engineering, and Operations.

“We look forward to having Glen apply his extensive packaging industry knowledge and proven management skills to secure and expand Delkor’s position within the very top tier of end-of-line automation providers, said Dale Andersen, Delkor’s President CEO, in making the announcement. “I personally look forward,” continued Andersen, “to working with Glen to devise and implement strategies that realize our company’s vision: *Delkor is a trusted provider to our customers of dependable, innovative packaging solutions that deliver value.*”

Long joins Delkor after an extensive career within the packaging industry, highlighted by senior management positions at INEX Vision Systems, Packaging Technologies, and BWI Fords Holmatic.

Glen has also been a strong and progressive leader within the Packaging Machinery Manufacturers Institute (PMMI) trade association, serving as PMMI Chairman in 1996 and by chairing several important PMMI committees, including Education and Global Marketing. Long currently is a member of the PMMI President’s Advisory Council.

Delkor Systems, Inc. is a leading North American manufacturer of end-of-line packaging systems, with innovative solutions to automatically form, load, inspect, wrap and seal end-of-line packaging trays, cartons and cases. Delkor designs practical solutions that enable customers to become lower-cost producers through the application of automation, robotics and other packaging line efficiencies. For more than thirty years, Delkor has provided high-quality, innovative end-of-line packaging machines that deliver these benefits.
